Harnessing Geobaric Pressure: Meet the ZeroHP CNG Solution

Experience the future of CNG with ZeroHP technology. Gone are the days of relying on mechanical compressors. ZeroHP CNG taps into the abundant high gas pressures naturally present in deep shale formations. This breakthrough innovation harnesses Geobaric Energy™, a renewable resource previously untapped. This patent pending technology is a first-of-its-kind application.

EFFICIENCY AND INNOVATION REDEFINED WITH ZEROHP CNG

Revolutionary Efficiency: By eliminating the need for mechanical compressors, it transforms traditional operations, significantly reducing capital and operating costs.

Eco-Friendly and Low Maintenance: Designed to minimize environmental impact and maintenance requirements, ZeroHP CNG streamlines the process while ensuring long-term reliability and performance.

ZeroHP CNG Advantages:

- Capital Costs
- Operating Costs
- Environmental Footprint
- Maintenance Requirements
- Fast Trailer Fill Time Without Chillers

SPECS:

Flow Rate: 15 MMSCFD
Outlet Pressure: up to 4200 PSIG
Dew Point: -40F

FEATURES:

- Direct from High Pressure Wellhead CNG
- Integrated Dual-lane Truck Loadout
- Low Fill Temperatures
- No Mechanical Compression
- Fast Deployment / Easily Transportable
